Spring Framework 3.1 is Now Generally Available

Adam FitzGerald | 14 DEC 2011 | 0 Comments

Spring 3.1 was released on Tuesday. The popular enterprise Java application development framework adds comprehensive Java-based application configuration, a new caching abstraction, environment profile support, as well as Hibernate 4, JDBC 4.1 and Java 7 fork/join support.

What's Next for Enterprise Social?

Mark Downey | 14 DEC 2011 | 0 Comments

Benjamin Mestrallet, eXo CEO, comments on Jive's successful IPO and what it means for enterprise social.

Goodbye \$300 SCJP designation. Hello \$600 OCP designation.

Cameron McKenzie | 13 DEC 2011 | 6 Comments

The old SCJP/OCP exam, which a developer could tackle by spending an hour in a testing center is now history. Now, Java Professional certification requires passing two certification exams, costing a hefty three hundred dollars a pop.

End-to-End Location Aware Programming

- WHAT'S NEW
- Adding MVEL to the Java Developers...**
As a Java developer you cannot afford to leave MVEL out of your toolbox. It fills a unique gap between complete programming environments and expression languages.

Open Mobster | 13 DEC 2011 | 0 Comments

This tutorial covers developing Location Aware Apps using the new Location Module of the OpenMobster platform. Location Awareness means writing your business logic by taking Location information into account. In OpenMobster, the business components are encapsulated with this Location information. The components then have easy access to the Location data and can easily integrate it with the...

Your first Java 8 Lambda Expression

Diarmuid Moloney | 12 DEC 2011 | 11 Comments

Who hasn't wanted to take a closer look at the Java 8 developer preview since its release last November? Java 7 has now shipped and the new focus is on Java 8 which is due to be released in late 2012. The Lambda syntax was finally confirmed after much debate by Brian Goetz on the lambda-dev mailing list and it will adopt the C# syntax.

JRebel vs OSGi: Use the right tool for the right job

Jevgeni Kabanov | 9 DEC 2011 | 1 Comments

If JRebel and OSGi are different, why do people compare them?

Does a tech start-up's infrastructure need to be that complex?

Nikita Salnikov-Tamovski | 9 DEC 2011 | 4 Comments

Everyone and your mom is speaking about how easy and cheap it is to launch a company in 2011. It turns out that setting up the infrastructure for a software startup alone is quite a task.

What Business Owners Should Know About Application Lifecycle Management

Cameron McKenzie | 8 DEC 2011 | 0 Comments

Traditional software project management tends to be restricted to the phases from planning through initial implementation. As a matter of course, project management stops when regular operations begin. In contrast, lifecycle management looks at the whole picture – up to and including deployment.

Just how expensive is a line of JavaScript code?

Cameron McKenzie | 8 DEC 2011 | 7 Comments

A Javascript line of code seems more expensive (a factor of 2-3) than the Java equivalent. It seems that the Javascript part of a project build always takes longer.

A Java developer's hit points: Slowly declining after age 35?

Cameron McKenzie | 7 DEC 2011 | 18 Comments

Really? Do we only get fifteen years of respect and reverence as application developers? Matt Heusser, in an article written for our sister site, IT Knowledge Exchange, asserts what many of us older folks plugging away in the development side of things are often thinking to ourselves, which is, 'are we too old to be programming once we've reached our forties?'

Standardize projects structure with Maven archetypes.

Alex Soto | 7 DEC 2011 | 0 Comments

If each time you start a new project you are of those who copy files from existing projects to the new one, apply DRY principle and create a Maven archetype from existing project. In this post I am going to explain how you create your own Maven archetype.

Jenkins Enterprise? I thought Jenkins already was 'Enterprise'

Cameron McKenzie | 6 DEC 2011 | 3 Comments

The latest Cloudbees PaaS offering promotes their new support offerings, while glossing over what really interests enterprise developers. really interested in.
